

WE ARE ENVIRONMENT COMMITTED

Our commitment of sustainable economic growth in harmony with the environment is at the heart of our values and our policies since years and is one of the pillars of our sustainability ambition. Beyond our involvement in lightweighting solutions for vehicles, we want to act for a better future by tackling climate change. Our **Be Green** strategic axis aims to lower by half GreenHouse Gas emission by 2030 as our contribution to limit global warming to 1.5 °C.

Our Responsibility

- **Comply with legal requirements** and other applicable conformity obligations.
- **Protect the environment** and prevent pollution.
- Commit to keep all our subsidiaries **ISO 14001** certified.
- **Improve continuously** our management system to enhance our environmental performance.
- **Involve our employees and our suppliers** in our approach to reduce environmental footprint.

Implementation

Top management is fully committed to make our policy successful and to provide necessary resources. Environment is integrated in all our activities, taking into account:

- rationally use of **natural resources**: water, raw materials and natural gas,
- promote **environmentally accountable supplies**,
- integrate **renewable energy**,
- optimize **energy consumption**,
- prevent, reduce, sort and finally responsibly dispose our remaining **wastes**,
- manage **chemicals** accountably by minimizing the consumption and taking care on the utilisation and storage,
- take actions to preserve the **biodiversity** and the ecosystems.

With our values, in particular Responsibility, Exchange and Innovation,
we will achieve our environment commitment.

Jiexiong TANG
Chief Executive Officer
